## OUR COMMITMENT TO YOU

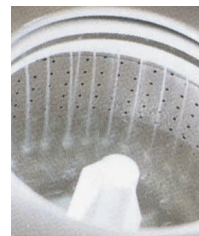

Our mission is to provide you with the latest in premium equipment, accurate collections and fast, reliable service. This commitment has contributed to our consistent, steady growth year after year.

Our field service technicians are supported by five, 15,000 square foot service centers, located in Fort Lauderdale, Hialeah, Tampa and Orlando. Each uniformed, factory trained service technician is equipped with a vehicle stocked with all the parts and equipment needed to respond quickly and professionally to your service needs. Come and experience the Statewide Laundry difference!

## HISTORY OF INNOVATION

Statewide Laundry and Speed Queen have been ahead of the industry in providing our customers with the latest product advancements.

In the seventies, we were the first to address the issue of energy conservation. We were the first to reduce water, gas and electrical

consumption. To this day we lead the industry in providing our customers with the

most energy efficient washers and dryers available.

In the Eighties, we installed the first card operated laundry equipment and Computerized Audit control Systems. In the Nineties and in the Millennium we continue to lead the industry with Speed Queen's Electronic display control laundry equipment that records every wash and dry cycle, every coin collected and every cycle selected.

Our commitment to this type of information technology exemplifies Statewide Laundry's dedication to providing you with the most advanced laundry room management program available.

## ACCOUNTABILITY

Since it's founding in 1972, Statewide Laundry has maintained the highest degree of accountability and security. To assure our customers of collection accuracy, Statewide Laundry installs Speed Queen

Electronic Display Control (EDC) laundry equipment. The EDC System records in exact detail the number of cycles each machine completes, the number of coins deposited in each machine, the cycles selected as well as the time and date of each collection.

Each commission check features a full activity report detailing gross collections per pay period and commissions paid. You have a choice at Statewide Laundry Equipment. Whether you choose coin or card options, you can be assured Statewide Laundry has the products that best suit

the needs of your property. With Speed Queen EDC machines, you can charge a different price for hot water, warm water and cold water cycles. By asking residents to pay more for the cycles that are more costly to operate, you can increase revenues and lower utility costs.

Our card systems are compatible with existing card systems in multi-family communities, colleges, universities, and other on-line and off-line debit card systems.

Statewide Laundry provides a full service laundry management program and will develop and implement a program which maximizes both revenues and resident satisfaction, while reducing water, sewer and energy costs.

## SUPERIOR TECHNOLOGY

We not only understand the challenges of managing a multi-housing laundry, we design solutions for them.

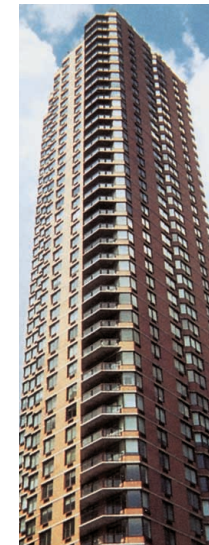

Our new Horizon product line features a free standing front-loading washer/extractor along with a single load dryer. These products will transform the multi-housing laundry industry. Today, water is a very expensive commodity. The Horizon washer/ extractor is designed to dramatically lower water and sewer costs. The Horizon washer uses approximately 23 gallons of water per cycle, a savings of 9 gallons per cycle compared to a top load washer. With the industry's

highest extract speed of 1010 RPM, the Horizon washer removes more water from the laundry during the spin cycle resulting in significantly reduced drying time. Reduced drying times will lower gas and electric consumption and enable residents to do their laundry in less time. Horizon washers and dryers comply with the Fair Housing Guidelines for ADA by conveniently locating the controls in the front making them accessible to everyone. With Statewide Laundry, you get leading technology, superior service, full accountability and profitable laundry rooms.

## PREFERRED CHOICE

We are the preferred choice of property managers and real estate management companies. Our solid reputation for service, ethical business practices, profitability, customer satisfaction and quality has resulted in our customers getting the MOST out of their laundry rooms.

## YOU CAN BE CONFIDENT

Prompt, professional service is the cornerstone of our business. Any service call you place before 12 noon will be taken care of the SAME DAY. Those calls received after 12:00 p.m. are always completed the following business day.

All of our service vehicles are clearly identified and equipped with digital cellular phones that enable us to maintain constant contact with our field service force. Our factory trained technicians are the best in the business.

Our service program includes routine laundry room inspections to ensure no out of service machines go unreported.

We conduct comprehensive preventative maintenance programs to insure your laundry rooms are always in excellent operating order.

Call us and experience the Statewide difference TODAY!
